Independent Auditor's Report

To the Owners and Management of KDB Bank Europe Ltd., pobočka zahraničnej banky:

We have audited the accompanying financial statements of KDB Bank Europe Ltd., pobočka zahraničnej banky ("Branch"), which comprise the statement of financial position as at 31 December 2013, the statements of profit or loss and other comprehensive income, changes in equity and cash flows for the period from 23 May 2013 to 31 December 2013, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management as represented by the statutory body is responsible for the preparation of these financial statements in accordance with International Financial Reporting Standards as adopted by the European Union and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation of the financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion

In our opinion, the financial statements give a true and fair view of the financial position of Branch as at 31 December 2013, and of its financial performance and its cash flows for the period then ended in accordance with International Financial Reporting Standards as adopted by the European Union.

KDB Bank Europe Ltd., pobočka zahraničnej banky

Notes to the financial statements for the period from 23 May 2013 to 31 December 2013

1. General information

KDB Bank Europe Ltd., pobočka zahraničnej banky (“the Branch”) was established on 23 May 2013 as a branch of KDB Bank Europe Ltd. (“Head Office” or “Bank”) and commenced its activities on 5 August 2013. The Branch provides banking services in the Slovak Republic under the single European passport principle.

The principal activities of the Branch are the provision of bank products and services to commercial and private customers not only resident in the Slovak Republic.

The Branch's registered office is at Obchodná 2, 811 06 Bratislava 1. The Branch's income tax (‘IČO’) and value added tax (‘DIČ’) identification numbers are as follows: IČO: 47 248 572, DIČ: 4020406775.

Statutory body:
Ing. Ladislav Šimko
Hee Joon Shin (from 20 December 2013)

Establisher:
KDB Bank Europe Ltd.

Financial statements for branch's headquarter are prepared by KDB Bank Europe Ltd. Financial statements for KDB Bank Europe Ltd. are available at Bajcsy Zsilinszky út 42 – 46, 1054 Budapest, Hungary.

Consolidated financial statements including the statements of the Bank are prepared by the Korea Development Bank, the ultimate parent company, and are available at 16 - 3 Yeouido-Dong Yeongdeungpo-gu, Seoul, 150-973 South Korea .

2. Basis of preparation

(a) Statement of compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards (‘IFRSs’) as adopted by the European Union.

These financial statements are prepared as required by the Section 17(a) of the Slovak Act on Accounting 431/2002, as amended.

(b) Basis of measurement

The financial statements have been prepared on the historical cost basis.

(c) Comparative figures

As the Branch was established during the 2013, this financial statements does not include any comparative period information.

(d) Functional and presentation currency

These financial statements are presented in euro, which is the Branch's functional currency. Except as otherwise indicated, financial information presented in euro has been rounded to the nearest thousand.

KDB Bank Europe Ltd., pobočka zahraničnej banky

Notes to the financial statements for the period from 23 May 2013 to 31 December 2013

2. Basis of preparation continued

(e) Use of estimates and judgements

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the application of the accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and in any future periods affected.

In particular, information about significant areas of estimation uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements is provided in note 4 and 5.

3. Significant accounting policies

The accounting policies set out below have been applied consistently in both periods presented in these financial statements.

(a) Transactions in foreign currency

Transactions denominated in foreign currencies are translated to euro at the exchange rates ruling on the date of the transaction. Monetary assets and liabilities are translated at the rates of exchange ruling at the end of reporting period. All resulting gains and losses are recorded in *Net trading income* in profit or loss.

(b) Interest income and expense

Interest income and expense are recognised in the profit or loss using the effective interest method. The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or liability (or, where appropriate, a shorter period) to the carrying amount of the financial asset or liability. The effective interest rate is established on initial recognition of the financial asset and liability and is not revised subsequently.

The calculation of the effective interest rate includes all fees paid or received, transaction costs and discounts or premiums that are an integral part of the effective interest rate. Transaction costs are incremental costs that are directly attributable to the acquisition or issue of a financial asset or liability.

Interest income and expense on all trading assets and liabilities are considered to be incidental to the Branch's trading operations and are presented, together with all other changes in the fair value of trading assets and liabilities, in *Net trading income*.

(c) Fees and commissions

Fees and commission income and expenses that are integral to the effective interest rate on a financial asset or liability are included in the measurement of the effective interest rate.

Other fees and commission income, including account servicing fees, investment management fees, sales commission, placement fees and syndication fees, are recognised as the related services are performed. When a loan commitment is not expected to result in the drawn-down of a loan, loan commitment fees are recognised on a straight-line basis over the commitment period.

Other fees and commission expense relates mainly to transaction and service fees, which are expensed as the services are received.

KDB Bank Europe Ltd., pobočka zahraničnej banky

Notes to the financial statements for the period from 23 May 2013 to 31 December 2013

3. Significant accounting policies continued

(d) Net trading income

Net trading income comprises gains less losses related to trading assets and liabilities and foreign exchange transactions.

(e) Lease payments

Payments made under operating leases are recognised in profit or loss on a straight-line basis over the term of the lease. Lease incentives received are recognised as an integral part of the total lease expense, over the term of the lease.

(f) Income tax

Income tax comprises current and deferred tax. Income tax is recognised in profit or loss except to the extent that it relates to items recognised in other comprehensive income.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the end of reporting period, and any adjustment to tax payable in respect of previous years.

Deferred tax is provided using the balance sheet method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

(g) Financial assets and liabilities

(i) Recognition

Loans and advances, deposits by banks and customer accounts are initially recognised on the date that they are originated. All other financial assets and liabilities (including assets and liabilities designated at fair value through profit or loss) are initially recognised on the trade date at which the Branch becomes a party to the contractual provisions of the instrument.

(ii) Derecognition

A financial asset is derecognised when the contractual rights to the cash flows from the asset expire, or rights to receive the contractual cash flows on the financial asset are transferred in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred. Any interest in transferred financial assets that is created or retained by the Branch is recognised as a separate asset or liability.

A financial liability is derecognised when the contractual obligations are discharged, cancelled or expire.

The Branch also derecognises certain assets when it writes off balances pertaining to assets deemed to be uncollectible.

(iii) Offsetting

Financial assets and liabilities are set off and the net amount presented in the statement of financial position when, and only when, the Branch has a legal right to set off the amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis only when permitted by the reporting standards, or for gains and losses arising from a group of similar transactions.

KDB Bank Europe Ltd., pobočka zahraničnej banky

Notes to the financial statements for the period from 23 May 2013 to 31 December 2013

3. Significant accounting policies continued

(g) Financial assets and liabilities continued

(iv) Amortised cost measurement

The amortised cost of a financial asset or liability is the amount at which the financial asset or liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation, using the effective interest method, of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment.

(v) Fair value measurement

The determination of fair values of financial assets and financial liabilities is based on quoted market prices or dealer price quotations for financial instruments traded in active markets. For all other financial instruments, fair value is determined by using valuation techniques. Valuation techniques include the discounted cash flow method and comparison to similar instruments for which market observable-prices exist.

Fair value hierarchy is followed in relation to the valuation of quoted market prices, the valuation of models with input data directly from the market and input data, which cannot be seen on the market.

(vi) Identification and measurement of impairment

At each end of reporting period, the Branch assesses whether there is objective evidence that financial assets not carried at fair value through profit or loss are impaired. Financial assets are impaired when objective evidence demonstrates that a loss event has occurred after the initial recognition of the asset, and that the loss event has an impact on the future cash flows of the asset that can be reliably estimated.

The Branch considers evidence of impairment at both a specific asset and collective level. All individually significant financial assets are assessed for specific impairment.

Objective evidence that financial assets (including investment securities) are impaired can include default or delinquency by a borrower, restructuring of a loan or advance by the Branch on terms that the Branch would not otherwise consider, indications that a borrower or issuer will enter bankruptcy, the disappearance of an active market for a security, or other observable data relating to a group of assets such as a deterioration in economic conditions or adverse changes in the payment status of borrowers or issuers in that group.

Impairment losses on assets carried at amortised cost are measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the asset's original effective interest rate. Losses are recognised in profit or loss and reflected in an allowance account against loans and advances. Interest on the impaired asset continues to be recognised through the unwinding of the discount.

When a subsequent event causes the amount of impairment loss to decrease, the impairment loss is reversed through profit or loss.

(h) Cash and cash equivalents

Cash and cash equivalents comprises cash, unrestricted balances held with the National Bank of Slovakia and highly liquid financial assets with original maturities of less than three months, which are subject to insignificant risk of changes in their fair value and are used by the Branch in the management of short-term commitments.

Cash and cash equivalents are carried at amortised cost in the statement of financial position.

(i) Trading assets and liabilities

Trading assets and liabilities are those assets and liabilities that the Branch acquires or incurs principally for the purpose of selling or repurchasing in the near term, or holds as part of a portfolio that is managed together for short-term profit or position taking.

KDB Bank Europe Ltd., pobočka zahraničnej banky

Notes to the financial statements for the period from 23 May 2013 to 31 December 2013

3. Significant accounting policies continued

(i) Trading assets and liabilities continued

Trading assets and liabilities are initially recognised and subsequently measured at fair value in the statement of financial position with transaction costs taken directly to the statement of profit or loss and other comprehensive income. All changes in fair value are recognised as part of *Net trading income*. Trading assets and liabilities are not reclassified subsequent to their initial recognition.

(j) Loans and advances

Loans and advances are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and that the Branch does not intend to sell immediately or in the near term.

Loans and advances are initially measured at fair value plus incremental direct transaction costs and subsequently measured at their amortised cost using the effective interest method.

When the Branch purchases a financial asset and simultaneously enters into an agreement to resell the asset (or a substantially similar asset) at a fixed price on a future date ('reverse repo or stock borrowing'), the agreement is accounted for as a loan or advance, and the underlying asset is not recognised in the Branch's financial statements.

(k) Property and equipment

(i) Recognition and measurement

Items of property and equipment are measured at cost less accumulated depreciation and impairment losses.

Cost includes expenditures that are directly attributable to the acquisition of the asset. Purchased software that is integral to the functionality of the related equipment is capitalised as part of the cost of that equipment.

When parts of an item of property or equipment have different useful lives, they are accounted for as separate items (major components) of property and equipment.

(ii) Subsequent costs

The cost of replacing part of an item of property or equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Branch and its cost can be reliably measured. The costs of the day-to-day servicing of property and equipment are recognised in profit or loss as incurred.

(iii) Depreciation

Depreciation is recognised in profit or loss on a straight-line basis over the estimated useful lives of each part of an item of property and equipment. All bank premises and equipment are stated at historical cost less depreciation and amortization. Land is not depreciated. The depreciation and amortization rates used are as follows:

Land and buildings	16 years – 50 years
Furniture, fittings and equipment	3 years – 7 years
Other	3 years – 6 years

Depreciation methods, useful lives and residual values are reassessed at the reporting date.

(l) Intangible assets

Software

Software is stated at cost less accumulated amortisation and impairment losses.

Amortisation is recognised on a straight line basis over the 3–year till 6-year estimated useful life of the software.

**Notes to the financial statements
for the period from 23 May 2013 to 31 December 2013**

3. Significant accounting policies continued

(m) Impairment of non-financial assets

The carrying amounts of the Branch's non-financial assets, other than deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists then the asset's recoverable amount is estimated.

An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. A cash-generating unit is the smallest identifiable asset group that generates cash flows that are largely independent of other assets and groups. Impairment losses are recognised in profit or loss. Impairment losses recognised in respect of cash-generating units are allocated to reduce the carrying amount of the other assets in the unit (group of units) on a *pro rata* basis.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risk specific to the asset.

Impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

(n) Deposits, customer accounts and Head Office funds

Deposits, customer accounts and Head Office funds are the Branch's main sources of financing.

Deposits, customer accounts and Head Office funds are initially measured at fair value plus transaction costs, and subsequently measured at their amortised cost using the effective interest method.

When the Branch sells a financial asset and simultaneously enters into a 'repo' or 'stock lending' agreement to repurchase the asset (or a similar asset) at a fixed price on a future date, the arrangement is accounted for as a deposit, and the underlying asset continues to be recognised in the Branch's financial statements.

(o) Provisions

A provision is recognised if, as a result of a past event, the Branch has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

A provision for onerous contracts is recognised when the expected benefits to be derived by the Branch from a contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the Branch recognises any impairment loss on the assets associated with that contract.

**Notes to the financial statements
for the period from 23 May 2013 to 31 December 2013**

3. Significant accounting policies continued

(p) Employee benefits

(i) Defined contribution plans

Obligations for contributions to defined contribution pension plans are recognised as an expense in profit or loss when they are due.

(ii) Termination benefits

Termination benefits are recognised as an expense when the Branch is demonstrably committed, without realistic possibility of withdrawal, to a formal detailed plan to terminate employment before the normal retirement date.

(iii) Short-term benefits

Short-term employee benefits obligations are measured on an undiscounted basis and are expensed as the related service is provided.

A provision is recognised for the amount expected to be paid under short-term cash bonus or profit-sharing plans if the Branch has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the obligation can be reliably estimated.

(q) New standards and interpretations not yet adopted

IFRS 12 Disclosure of Interests in Other Entities

Effective for annual periods beginning on or after 1 January 2014; to be applied retrospectively, except not required to present comparative information for unconsolidated structured entities for any periods before the first annual period for which IFRS 12 is applied. Earlier application is permitted.

IFRS 12 requires additional disclosures relating to significant judgements and assumptions made in determining the nature of interests in an entity or arrangement, interests in subsidiaries, joint arrangements and associates and unconsolidated structured entities.

The entity does not expect the new Standard will have a material impact on the financial statements.

IAS 27 (2011) Separate Financial Statements

Effective for annual periods beginning on or after 1 January 2014. Earlier application is permitted if IFRS 10, IFRS 11, IFRS 12 and IAS 28 (2011) are also applied early.

IAS 27 (2011) carries forward the existing accounting and disclosure requirements of IAS 27 (2008) for separate financial statements, with some minor clarifications. As well, the existing requirements of IAS 28 (2008) and IAS 31 for separate financial statements have been incorporated into IAS 27 (2011). The Standard no longer addresses the principle of control and requirements relating to the preparation of consolidated financial statements, which have been incorporated into IFRS 10, Consolidated Financial Statements.

The Branch does not expect IAS 27 (2011) to have material impact on the financial statements, since it does not result in a change in the entity's accounting policy.

IAS 28 (2011) Investments in Associates and Joint Ventures

Amendments effective for annual periods beginning on or after 1 January 2014; to be applied retrospectively. Earlier application is permitted if IFRS 10, IFRS 11, IFRS 12 and IAS 27 (2011) are also applied early.

**Notes to the financial statements
for the period from 23 May 2013 to 31 December 2013**

3. Significant accounting policies continued

(q) New standards and interpretations not yet adopted continued

There are limited amendments made to IAS 28 (2008):

- Associates and joint ventures held for sale. IFRS 5, Non-current Assets Held for Sale and Discontinued Operations applies to an investment, or a portion of an investment, in an associate or a joint venture that meets the criteria to be classified as held for sale. For any retained portion of the investment that has not been classified as held for sale, the equity method is applied until disposal of the portion held for sale. After disposal, any retained interest is accounted for using the equity method if the retained interest continues to be an associate or a joint venture.
- Changes in interests held in associates and joint ventures. Previously, IAS 28 (2008) and IAS 31 specified that the cessation of significant influence or joint control triggered remeasurement of any retained stake in all cases, even if significant influence was succeeded by joint control. IAS 28 (2011) now requires that in such scenarios the retained interest in the investment is not remeasured.

The Branch does not expect the amendments to Standard to have material impact on the financial statements since it does not have any investments in associates or joint ventures that will be impacted by the amendments.

Amendments to IAS 32 – Offsetting Financial Assets and Financial Liabilities

Effective for annual periods beginning on or after 1 January 2014; to be applied retrospectively. Earlier application is permitted, however the additional disclosures required by Amendments to IFRS 7 Disclosures - Offsetting Financial Assets and Financial Liabilities must also be made.

The Amendments do not introduce new rules for offsetting financial assets and liabilities; rather they clarify the offsetting criteria to address inconsistencies in their application.

The Amendments clarify that an entity currently has a legally enforceable right to set-off if that right is:

- not contingent on a future event; and
- enforceable both in the normal course of business and in the event of default, insolvency or bankruptcy of the entity and all counterparties.

The Branch does not expect the Amendments to have any impact on the financial statements since it does not apply offsetting to any of its financial assets and financial liabilities and it has not entered into master netting arrangements.

Amendments to IAS 36 – Recoverable Amount Disclosures for Non-Financial Assets

Effective for annual periods beginning on or after 1 January 2014; to be applied retrospectively. Earlier application is permitted, however an entity shall not apply the amendments in periods (including comparative periods) in which it does not also apply IFRS 13.

The Amendments clarify that recoverable amount should be disclosed only for individual assets (including goodwill) or cash-generated units for which an impairment loss was recognised or reversed during the period.

The Amendments also require the following additional disclosures when an impairment for individual assets (including goodwill) or cash-generated units has been recognised or reversed in the period and recoverable amount is based on fair value less costs to disposal:

- the level of IFRS 13 'Fair value hierarchy' within which the fair value measurement of the asset or cash-generating unit is categorised;

**Notes to the financial statements
for the period from 23 May 2013 to 31 December 2013**

3. Significant accounting policies continued

(q) New standards and interpretations not yet adopted continued

- for fair value measurements categorised within Level 2 and Level 3 of the fair value hierarchy, a description of the valuation techniques used and any changes in that valuation technique together with the reason for making it;
- for fair value measurements categorised within Level 2 and Level 3, each key assumption (i.e. assumptions to which the recoverable amount is most sensitive) used in determining fair value less costs of disposal. If fair value less costs of disposal is measured using a present value technique, the discount rate(s) used both in current and previous measurement should be disclosed.

The Branch does not expect that the new Standard will have a material impact on the financial statements.

Amendments to IAS 39 – Novation of Derivatives and Continuation of Hedge Accounting

Effective for annual periods beginning on or after 1 January 2014; to be applied retrospectively. Earlier application is permitted, however the Branch shall not apply the amendments in periods (including comparative periods) in which it does not also apply IFRS 13.

The Amendments allows hedge accounting to continue in a situation where a derivative, which has been designated as a hedging instrument, is novated to effect clearing with a central counterparty as a result of laws and regulations, when the following criteria are met:

- The novation is made as a consequence of laws or regulations
- A clearing counterparty becomes a new counterparty to each of the original counterparties of the derivative instrument
- Changes to the terms of the derivative are limited to those necessary to replace the counterparty.

The Branch does not expect the new standard to have any impact on the financial statements, since it does not novate derivatives designated as hedging instruments to central counterparties as a consequence of laws and regulations.

KDB Bank Europe Ltd., pobočka zahraničnej banky

Notes to the financial statements for the period from 23 May 2013 to 31 December 2013

4. Use of estimates and judgements

These disclosures supplement the commentary on financial risk management.

Key sources of estimation uncertainty

Allowances for impairment

Assets accounted for at amortised cost are assessed for impairment as described in accounting policy.

The specific counterparty component of the total allowances for impairment applies to claims assessed individually for impairment and is based on management's best estimate of the present value of the cash flows that are expected to be received. In estimating these cash flows, management makes judgements about the counterparty's financial situation and the net realisable value of any underlying collateral. Each impaired asset is assessed on its merits and the workout strategy and estimate of cash flows considered recoverable are independently approved by the management responsible for credit risk management.

Determining fair values

The determination of fair value for financial assets and liabilities for which there is no observable market price requires the use of valuation techniques as described in accounting policy. For financial instruments that trade infrequently and have little price transparency, fair value is less objective and requires varying degrees of judgement depending on liquidity, concentration, uncertainty of market factors, pricing assumptions and other risks affecting the specific instrument.

Valuation of financial instruments

The Branch's accounting policies and methods for fair value measurements is discussed under note 3(g)(q) and note 27.

The Branch measures fair values using the following hierarchy of methods:

- Quoted market price in an active market for an identical instrument (Level 1).
- Valuation techniques based on observable inputs. This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data (Level 2). Loans and advances to customers are included in the Level 2 hierarchy category.
- Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs could have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments (Level 3).

Fair values of financial assets and financial liabilities that are traded in active markets are based on quoted market prices or dealer price quotations. For all other financial instruments, the Bank determines fair values using valuation techniques.

Valuation techniques include net present value and discounted cash flow models, comparison to similar instruments for which market observable prices exist and other valuation models. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premium used in estimating discount rates. The objective of valuation techniques is to arrive at a fair value determination that reflects the price of the financial instrument at the reporting date that would have been determined by market participants acting at arm's length.

**Notes to the financial statements
for the period from 23 May 2013 to 31 December 2013**

5. Financial risk management

(a) Introduction

The Branch has exposure to the following risks:

- credit risk
- liquidity risk
- market risk
- operational risk

Information on the exposure to each of the above risks; the objectives, policies and processes for measuring and managing risk is set out below.

Risk management framework

Management have overall responsibility for the establishment and oversight of the Branch's risk management framework. In exercising this responsibility they have established the Risk Management Committee (RMC), which are responsible for developing and monitoring risk management policies in their respective areas.

The Branch's risk management policies are established to identify and analyse the risks faced by the Branch, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions, products and services offered. The Branch, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment, in which all employees understand their roles and obligations.

The Branch uses a wide range of financial instruments. A financial instrument is a contract that gives rise to both a financial asset of one enterprise and a financial liability or equity instrument of another enterprise. Examples include loans and deposits.

Derivatives are also financial instruments which are so called because their value is derived from the value of an underlying instrument, index or reference rate. The principal categories of derivatives are forwards, including futures, options and swaps.

(b) Credit risk

Credit risk is the risk of financial loss to the Branch if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Branch's loans and advances to customers, the provision of guarantees, the issuance of documentary credits, loans and advances to other banks and the purchase of investment securities. For risk management reporting purposes, the Branch considers and consolidates all elements of credit risk exposure (such as individual obligor default risk, country and sector risk).

Credit risk is strictly controlled through a structure involving Management, the credit risk department and credit risk management of the Branch's Head Office.

The Branch's procedures for managing credit risk include the establishment of concentration limits by borrower, counterparty, industrial sector and product. Credit appraisal procedures are performed before individual borrower and counterparty limits are approved, and collateral is obtained to reduce credit risk. The Branch also continually monitors performance of the portfolio to ensure that prompt action can be taken to minimise potential losses.

KDB Bank Europe Ltd., pobočka zahraničnej banky

Notes to the financial statements for the period from 23 May 2013 to 31 December 2013

5. Financial risk management continued

(b) Credit risk continued

The Branch is required to implement credit policies and procedures, with credit approval authorities delegated by the Head Office Credit Committee. The Branch is responsible for the quality and performance of its credit portfolio and for monitoring and controlling all credit risks, including those subject to central approval.

Regular audits on credit processes are undertaken by Internal Audit.

Classification of receivables

Receivables are classified by Asset Quality Classification (“AQC”) into 5 grades.

Problem free receivables (1): Based upon a reliable documentation it can be assumed that a claim will be reimbursed totally without any predictable loss, and delinquency in principal or interest payment is not more than 15 days.

Monitoring receivables (2): If there is no sign of a possible future loss at the time of evaluation but the Branch obtains such information that supports the special treatment. Those claims, that require extraordinary handling as a consequence of a debtor, credit type or other factor, may also belong to this category.

Below average receivables (3): If uncertain amount of loss at the time of evaluation can be foreseen or a claim bears a higher risk than an average one.

Doubtful receivables (4): If delinquency exceeds 90 days, or at the time of evaluation certain amount of loss seems to be unavoidable but the amount of loss is not known.

Bad (impaired) receivables (5): If the foreseeable loss exceeds 70 % of its total outstanding amount, and the debtor does not settle its obligation in spite of several warnings, or liquidation procedure has been started against the debtor.

Past due but not impaired receivables

Loans and securities where contractual interest or principal payments are past due but the Branch believes that impairment is not appropriate on the basis of the level of security/collateral available and/or the stage of collection of amounts owed to the Branch.

Receivables with renegotiated terms

Receivables with renegotiated terms are loans that have been restructured due to deterioration in the borrower’s financial position and where the Branch has made concessions that it would not otherwise consider. After the restructuring these receivables are graded 2 the Branch’s internal credit risk grading system. The restructured receivable remains in this category in case of satisfactory performance after restructuring, in case of non-satisfactory performance it would be classified in lower grade (from 3 to 5) accordingly.

KDB Bank Europe Ltd., pobočka zahraničnej banky

Notes to the financial statements for the period from 23 May 2013 to 31 December 2013

5. Financial risk management continued

(b) Credit risk continued

Allowances for impairment

The Branch establishes an allowance for impairment losses that represents its estimate of incurred losses in its loan portfolio. The main components of this allowance are a specific loss component that relates to individually significant exposures.

The gross amounts of individually impaired loans and advances to customers and by risk grade:

	Loans and advances to customers 2013 €'000
Neither past due nor impaired	
Grade 1:	25,744
Grade 2:	-
Grade 3:	-
Grade 4:	-
Past due or impaired	
Grade 5	-
Allowance for impairment	-
Total carrying amount	<u>25,744</u>

At 31 December 2013, the Branch did not have clients with default loans (grade 5). The Branch did not have loans on accounts with renegotiated terms (grade 2) or in grade 3 and 4.

Write-off policy

The Branch writes off a loan/security balance (and any related allowances for impairment losses) graded 5, when Work Out Department determines that the loans/securities are uncollectible. This determination is reached after considering information such as the occurrence of significant changes in the borrower/issuer's financial position such that the borrower/issuer can no longer pay the obligation, or that proceeds from collateral will not be sufficient to pay back the entire exposure.

Collateral

The Branch holds collateral against loans and advances to customers in the form of mortgage interests over property, other registered securities over assets and guarantees. Estimates of fair values are based on the value of collateral assessed at the time of borrowing and generally are not updated except when a loan is individually assessed as impaired. Generally, collateral is not held for loans and advances to banks, except when securities are held as part of reverse repurchase and securities borrowing activity. Similarly, collateral is not usually held in respect of investment securities, and no such collateral was held at 31 December 2013.

KDB Bank Europe Ltd., pobočka zahraničnej banky

Notes to the financial statements for the period from 23 May 2013 to 31 December 2013

5. Financial risk management continued

(b) Credit risk continued

The Branch monitors concentrations of credit risk by sector and by geographic location. An analysis of concentrations of credit risk is shown below:

	Loans and advances to customers 2013 €'000
Concentration by sector	
Corporate	25,744
Bank	-
State	-
Retail	-
	<hr/>
	25,744
	<hr/> <hr/>
	Loans and advances to customers 2013 €'000
Concentration by location	
Slovak Republic	5,743
Hungary	-
Czech Republic	20,001
South Korea	-
	<hr/>
	25,744
	<hr/> <hr/>

Concentration by location for loans and advances is measured based on the location of the entity holding the assets, which has a high correlation with the location of the borrower. Concentration by location of any investment securities is measured based on the location of the issuer of the security.

Settlement risk

The Branch's activities may give rise to risk at the time of settlement of transactions and trades. Settlement risk is the risk of loss due to the failure of a counter party to honor its obligations to deliver cash, securities or other assets as contractually agreed.

For certain types of transactions, the Branch mitigates this risk by conducting settlements through a settlement/ clearing agent to ensure that a trade is settled only when both parties have fulfilled their contractual obligations. Settlement limits form part of the credit approval/limit and monitoring process.

KDB Bank Europe Ltd., pobočka zahraničnej banky

Notes to the financial statements for the period from 23 May 2013 to 31 December 2013

5. Financial risk management continued

(c) Liquidity risk

Liquidity risk is the risk that the Branch will encounter difficulty in meeting obligations from its financial liabilities.

Management of liquidity risk

The Branch's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Branch's reputation.

The Treasury department is in KDB Bank Europe Ltd., the Branch receives information regarding the liquidity profile of the Branch's financial assets and liabilities and details of other projected cash flows arising from projected future business. The Treasury department then maintains a portfolio of short-term liquid assets, largely made up of short-term liquid investment securities, loans and advances to banks and other inter-bank facilities, to ensure that sufficient liquidity is maintained within the Branch. The liquidity requirements are met through short-term loans from inter-bank market to cover any short-term fluctuations, and longer-term funding to address any structural liquidity requirements.

The daily liquidity position is monitored. All liquidity policies and procedures are subject to review and approval of the RMC. Daily reports cover the liquidity position.

Liquidity risk management system

A summary report, including any exceptions and remedial actions taken, is submitted regularly to the RMC.

Liquidity risk rate

All procedures and activities in the area of the Branch's liquidity management are provided by KDB Bank Europe Ltd. The purpose is to ensure the maximum matching of asset and liability maturities, in individual currencies and to ensure the necessary structure of assets.

By consistent implementation of the liquidity management strategy, an almost perfect matching of asset and liability maturities should be obtained. RMC of KDB Bank Europe Ltd. is kept informed of the liquidity position of the Branch.

An important element in the liquidity management system is the regular provision of information to top management on liquidity status, and in particular, if liquidity significantly differs from the expected status. Information for top management has to be regular, timely and in sufficient detail to allow the evaluation of the Branch's liquidity risk as a whole or in individual portfolios.

The Branch uses maturity GAP calculations for monitoring liquidity risk. GAP calculations are prepared for the main currencies (EUR, HUF, USD, and CHF) and aggregated level. The assets and liabilities are classified regarding their remaining maturity according to the original date shown in the contract.

The remaining period to maturity of monetary assets and liabilities at 31 December 2013 is in the following table, which presents the undiscounted cash flows in relation to their earlier maturity:

Cash flows expected by the branch can differ significantly from this analysis. For example, it is expected, that client's accounts of liabilities will stay stable or with rising balance:

	<u>12,526</u>	<u>11,806</u>	<u>15,189</u>	<u>-</u>	<u>330</u>	<u>39,851</u>

(d) Market risk

Market risk is the risk that changes in market prices, such as interest rate, equity prices, foreign exchange rates and credit spreads (not relating to changes in the obligor's/issuer's credit standing) will affect the Branch's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return on risk.

Management of market risks

The principal risk to which non-trading portfolios are exposed is the risk of loss from fluctuations in the future cash flows or fair values of financial instruments because of a change in market interest rates. Interest rate risk is managed principally through monitoring interest rate gaps and by having pre-approved limits for repricing bands. The RMC is the monitoring body for compliance with these limits and is assisted by Risk Management in its day-to-day monitoring activities.

In general, untradeable positions of interest rates risk is managed by Treasury division, which use investment securities, loans and advances to banks and derivative instruments to manage the overall position of the branch of non-tradable activities.

(e) Operational risk

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the Branch's processes, personnel, technology and infrastructure, and from external factors other than credit, market and liquidity risks such as those arising from legal and regulatory requirements and generally accepted standards of corporate behavior. Operational risks arise from all of the Branch's operations and are faced by all business entities.

The Branch's objective is to manage operational risk so as to balance the avoidance of financial losses and damage to the Branch's reputation with overall cost effectiveness.

KDB Bank Europe Ltd., pobočka zahraničnej banky

Notes to the financial statements for the period from 23 May 2013 to 31 December 2013

5. Financial risk management continued

(e) Operational risk continued

The primary responsibility for the development and implementation of controls to address operational risk is assigned to the management. This responsibility is supported by the development of overall standards for the management of operational risk in the following areas:

- requirements for the reconciliation and monitoring of transactions
- compliance with regulatory and other legal requirements
- documentation of controls and procedures
- requirements for the periodic assessment of operational risks faced, and the adequacy of controls and procedures to address the risks identified
- requirements for the reporting of operational losses and proposed remedial action
- development of contingency plans
- training and professional development
- ethical and business standards
- risk mitigation, including insurance where this is effective.

Compliance with Branch's standards is supported by a program of periodic reviews undertaken by Internal Audit. The results of Internal Audit reviews are discussed with the relevant managers, with summaries submitted to senior management of the Branch.

(f) Capital management

KDB Bank Europe Ltd.'s lead regulator is National Bank of Hungary, which sets and monitors capital requirements for the Group as a whole. As a branch of KDB Bank Europe Ltd., the Branch is not subject to the capital requirements set by the National Bank of Slovakia ("NBS").

6. Cash and cash equivalents

Loss for 2013	-	-	(94)	(94)
At 31 December 2013	<u>26,330</u>	<u>148</u>	<u>(94)</u>	<u>26,384</u>

Head Office funding totalling €26,000 thousands was provided by KDB Bank Europe Ltd. to the Branch as interbank borrowing for funding business activities (corporate financing).

Other Head Office funding totalling €330 thousands was provided by KDB Bank Europe Ltd. to the Branch in accordance with the Funds Allocation Rules ("the Rules") agreed on 3 September 2013. Under the Rules, the funds are to be used at the Branch's discretion for general operational purposes (funding operational expenses). The funds do not bear interest, and are repayable in full on request by Head Office, or in whole or in part at any time on the decision of the Branch.

KDB Bank Europe Ltd., pobočka zahraničnej banky

Notes to the financial statements for the period from 23 May 2013 to 31 December 2013

16. Commitments and contingencies

The Branch did not have commitments and contingencies as at 31 December 2013.

17. Deferred tax asset

If certain conditions are met, Slovak tax legislation permits the carry forward of tax losses for offset against future taxable profits. Losses may be carried forward and utilized on the straight line basis against future taxable profits over a maximum period of four years.

The deferred tax asset was not recognised as at 31 December 2013 (note 23).

18. Interest income

	Period from 23 May 2013 to 31 December 2013 €'000
Loans and advances to banks	-
Loans and advances to customers	<u>263</u>
	<u><u>263</u></u>

As part of the interest income from loans and advances to customers €0 thousand is recognized as proceeds from impaired loans.

	<hr/> <hr/>

25. Related party transactions

Parties are considered to be related if one party has the ability to control or exercise significant influence over the other party in making financial or operational decisions. The Branch is controlled by KDB Bank Europe Ltd., which is incorporated in Hungary.

A number of banking transactions are entered into with related parties in the normal course of business. These include loans, deposits and foreign currency transactions. These transactions were carried out on commercial terms and at market rates.

(a) Head Office

Amounts due from and to the Head Office were as follows:

	2013 €'000
<i>Assets</i>	
Cash and cash equivalents	-
Loans and advances to banks	-
<i>Liabilities</i>	
Deposits by banks	-
Head Office funds:	
Interbank borrowing	26,000
Fund transfer	330
<i>Transactions during the year were as follows:</i>	
Interest income	-
Interest expense	148
Head Office charges	-

KDB Bank Europe Ltd., pobočka zahraničnej banky

Notes to the financial statements for the period from 23 May 2013 to 31 December 2013

25. Related party transactions continued

(b) Enterprises related to Head Office

There were no amounts due from and to companies related to Head Office as at 31 December 2013.

(c) Senior management

There were no amounts due from and to senior management, or close relatives or companies in which they have a substantial interest, of the Branch as at 31 December 2013.

26. Operating lease

The Branch has signed lease agreements as at 31 December 2013 with the following notice periods:

€'000	Up to 3 months	3 months - 1 year	1 year- 5 years	More than 5 years
Leased property	10	31	147	-
Leased furniture	2	6	12	-
	12	37	159	-

27. Fair values

Fair value is the amount at which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction. The estimated fair values of the Branch's financial assets and liabilities at year end were as follows:

	Carrying value 2013 €'000	Fair value 2013 €'000
<i>Financial assets</i>		
Cash and cash equivalents	13,821	13,821
Loans and advances to banks	41	41
Loans and advances to customers	25,744	25,744
<i>Financial liabilities</i>		
Deposits by banks	-	-
Customer accounts	13,306	13,306

**Notes to the financial statements
for the period from 23 May 2013 to 31 December 2013**

27. Fair values continued

The following methods and assumptions were used in estimating the fair values of the Branch's financial assets and liabilities:

Loans and advances to banks

The fair value of current accounts with other banks approximates to book value. For amounts with a remaining maturity of less than three months, it is also reasonable to use book value as an approximation of fair value. The fair values of other loans and advances to banks are calculated by discounting the future cash flows using current interbank rates.

Loans and advances to customers

Loans and advances are stated net of any impairment losses. The fair values of other loans and advances to customers are calculated by discounting the future cash flows using current market rates.

Deposits by banks

The fair value of current accounts with other banks approximates to book value. For other amounts owed to banks with a remaining maturity of less than three months, it is also reasonable to use book value as an approximation of fair value. The fair values of other deposits by banks are calculated by discounting the future cash flows using current interbank rates.

Customer accounts

The fair values of current accounts and term deposits with a remaining maturity of less than three months approximate their carrying amounts. The fair values of other customer accounts are calculated by discounting the future cash flows using current deposit rates.
